

PRESS RELEASE

For Immediate Release:

Netcom Technologies, Inc. Announces Record Profits for 2012.

Netcom Technologies, Inc. (Netcom) announced today, April 09, 2013, that fiscal year 2012 produced the highest profitability in company history. This is coming off of a two year period of elevated revenues and level to small percentage profitability.

President/CEO Roy Rea had this to say about the financial results, "I am extremely pleased with our 2012 results. These results are a strong testament to the changes Netcom made to its business model in early 2012. The most significant changes were to eliminate unproductive overhead and refocus our resources on our core clients and business capabilities. Netcom ended the year debt free, with significant capital reserves to carry the business into the future. We look forward to a robust book of business in 2013 and another successful year."

About Netcom:

For the past 25 years, NETCOM Technologies, Inc., a privately held corporation, has consistently proven its ability to deliver "best value" inside and outside cable plant, IP video and security infrastructure, and telephony solutions to both public and private sectors. NETCOM has evolved from a regional cable plant installation provider into a nationwide provider of comprehensive and secure telecommunications infrastructure and security services.
