For Immediate Release:

Netcom Technologies, Inc. Announces Bureau of Engraving and Printing (BEP) Award

Netcom Technologies, Inc. (Netcom), a leading infrastructure and physical security solutions provider announced today, July 13, 2016, that it has been awarded a 5 year BPA contract with The Bureau of Engraving and Printing (BEP).

Roy Rea, the President and CEO of Netcom, stated “Netcom has been awarded a contract with the BEP in its continued support of its Headquarters in Washington, DC.”

Bill Lambros, an Account Executive at Netcom that developed this award added, “We have been supporting BEP with its cabling infrastructure needs since 1997. Netcom has installed over 6000 Cat. 6 workstation outlets, along with an extensive OM3 fiber backbone with redundancy in both buildings. We performed a very large obsolete cable removal/firestop project in both buildings in DC. We installed all new fiber to over 1200 video surveillance cameras. We also installed a complete OM3 fiber backbone system in the Fort Worth, Texas facility. We continue to provide excellent service in maintaining the existing cable plant as well as performing MAC work on a daily basis. These awards are a tribute to the efforts of the entire Netcom Team.”

About Netcom:

For the past 28 years, NETCOM Technologies, Inc., a privately held corporation, has consistently proven its ability to deliver “best value” inside and outside cable plant, IP video and security infrastructure, and telephony solutions to both public and private sectors. NETCOM has evolved from a regional cable plant installation provider into a nationwide provider of comprehensive and secure telecommunications infrastructure and security services.
