

PRESS RELEASE

For Immediate Release:

Netcom Technologies, Inc. announces a contract award on its GSA Connections 2 Contract for FBI's Mission Ridge Project in the Mid-Atlantic Area.

Netcom Technologies, Inc. (Netcom) announced today, May 5, 2014, that the General Services Administration has awarded Netcom a contract to provide a network cable infrastructure installation for this FBI Facility. The project is the "largest FBI has designed to date" as echoed by FBI representatives involved with the project. This project is not only large it is also very fast track. Netcom demonstrated in its technical and schedule approach in our proposal why we were the only choice for GSA to insure effective support for one of its most valued customers.

President and CEO Roy Rea, had this to say about the award: "We are very proud to again be serving GSA Region 7 on this critical infrastructure project for its valuable customer. This project is unique in its design and extremely fast track. It's also utilizing the latest in cable technology. Netcom developed a solid approach to this project with an excellent team of manufacturer partners, distribution partners and management and technical professionals within our organization that will insure this project will be done smoothly, professionally, and on-time."

About Netcom:

For over 26 years, NETCOM Technologies, Inc., a privately held corporation, has consistently proven its ability to deliver "best value" inside and outside cable plant, IP video and security infrastructure, and telephony solutions to both public and private sectors. NETCOM has evolved from a regional cable plant installation provider into a nationwide provider of comprehensive and secure telecommunications infrastructure and security services.
