

PRESS RELEASE

For Immediate Release:

NETCOM Technologies, Inc. announces a contract award from Helix Electric, working in conjunction with Clark Construction, for a 164 unit mixed use residential property known as West End Square 37.

This project includes the installation of Cat.6 and RG-6 coax structured wiring in each unit to a residential MSDE enclosure, as well as copper and coax backbone cabling to each unit from the floor serving telecommunications rooms. NETCOM will also provide cabling services, both backbone and horizontal, for the new DC Public Library which will be housed on the ground floor, as well as the residential administrative and amenities spaces. Additionally, NETCOM has also been awarded the Access Control as well as the CCTV installation for this project.

President and CEO Roy Rea, had this to say about the award: “We are very proud to be working with both Helix Electric and Clark Construction on this project for its valuable customer. This project is unique in its design and extremely fast track. It’s also utilizing the latest in cable and security technology. NETCOM developed a solid approach to this project with an excellent team of manufacturer partners, distribution partners and management and technical professionals within our organization that will insure this project will be done smoothly, professionally, and on-time.”

About Netcom:

For over 28 years, NETCOM Technologies, Inc., a privately held corporation, has consistently proven its ability to deliver “best value” inside and outside cable plant, IP video, security infrastructure, telephony and electrical solutions to both public and private sectors. NETCOM has evolved from a regional cable plant installation provider into a nationwide provider of comprehensive and secure telecommunications infrastructure, security services and electrical solutions.
